A Wild Hog

BRISTLE . . . the best sweeping material known . . . is a product of the Wild Hog. The price of Bristle has advanced by leaps and bounds in the last few years.

As per United States Department of Commerce, in the year 1932, we imported from Soviet Russia, 151,050 pounds of Bristles at a cost of about \$1.21 per pound.

In the year 1934, we imported from Soviet Russia, only 1394 pounds, at a cost of about \$4.60 per pound.

Note the decrease in pounds and increase in price.

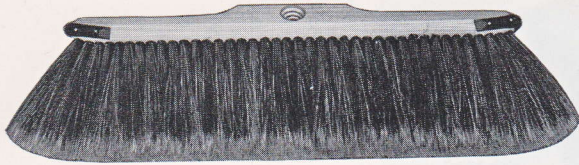

The above Chinese are inspecting and preparing bristles for export shipments

## PITCH-SET BRISTLE FLOOR BRUSHES

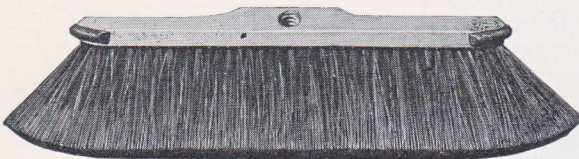

### De Luxe

DE LUXE Brushes represent the last word in brush-making skill. They are now made on well chamfered blocks, and of 100% highest grade full stiff grey Bristle. All DE LUXE Brushes contain many more holes than most bristle brushes and each hole is well filled. This produces a wonderful sweeping surface, 4" trim with about 3" flare at ends. This is the brush to use where absolute cleanliness is required.

## Standard Brushes

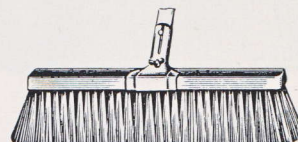

Are different. Six reasons why X Blocks are best:

- 1st — It is lighter and stronger.
- 2nd—No handle holes to split and break the blocks.
- 3rd—No broken handles.
- 4th—Blocks are half the weight of old style blocks with chuck or threaded handle holes, as such blocks must be made thick and heavy in order to hold at all.
- 5th—Half the labor for the janitor is only handling about half the weight sweeping.
- 6th—Brushes last much longer because the brush fiber does not carry excess weight of the heavy blocks.

### REMEMBER

Any brushes we make may be had on the light X Block. No extra cost.

A 15/16" polished handle will be furnished with all Hair and Tampico Brushes made on the X Block.

## INDUSTRIAL BROOMS

Standard Janitor and Mill Brooms are the best to be had.

Note the solid steel cores. This, alone, assures you that the broom will never become loose on the handle.

Standard Brooms are noted for smooth hardwood handles.

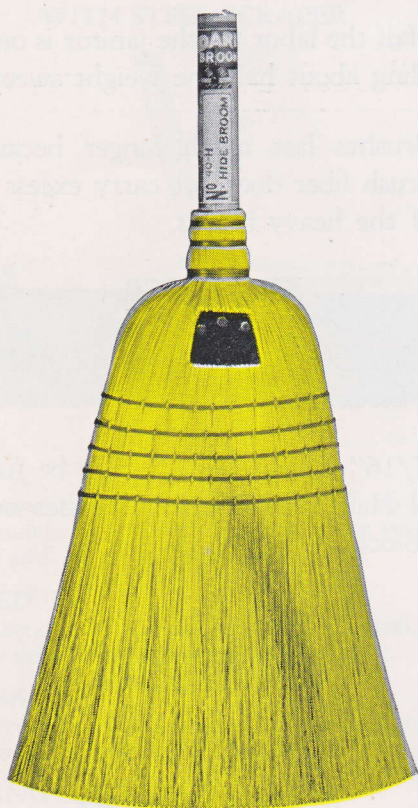

Inner steel core, workmanship and prime, first quality material—this is the reason so many are calling for Standard Mill Brooms.
